INTRODUCTION

a little about us

History

Established in 1996, the philosophy of always delivering outstanding customer service combined with superior product range and quality has seen R&J Batteries continue to grow and develop into Australia's fastest growing battery company. We have now become a true force throughout Australia in the supply of batteries for all applications including automotive, commercial, motorcycle, marine, deep cycle, solar and industrial batteries.

Our People

With representation in every state and territory, our company-owned stores are all staffed by extremely dedicated and knowledgeable personnel who are committed to providing you with the very best in service and expert advice. To further enhance our national footprint we have developed an extensive network of specialist battery-industry distributors around Australia who will ensure that you receive the very best in terms of product and service no matter where you are.

Our Products

Our experienced research and development team remain committed to seeking out the very latest in battery technology worldwide to ensure we offer you the best value possible. We continually work with our global supply partners to improve and refine the products we offer. All of this is aimed at providing you the customer with a complete range of products and services which exceed all expectations.

Our Service

Our intrinsic belief in building strong business relationships, based on mutual growth and by providing cost-effective solutions, coupled with the best in service has always been our mission. This will never change.

Our service will always be second to none!

ADELAIDE

E. jo.preece@rjbatt.com.au

SAFETY Warnings & Information

Corrosive Hazard:

- The product is hazardous according to the definition of Work Safe Australia.
- All relevant safety precautions should be followed.

Warning:

- Keep battery and acid out of reach of children at all times.
- Always store in a safe place, preferably in a plastic tray.
- Keep battery out of direct sunlight, away from any heat sources.
- When charging battery, ensure good ventilation.
- Polypropylene case can be subject to static electricity, do not rub case, wear rubber gloves when handling.
- Batteries are heavy in nature, use correct lifting procedure.
- Do not tilt the battery, allowing acid to leak out of vents.
- Use baking soda and water to dilute any acid spillage.

Warning statements:

- Observe the precautionary information on the battery label and the vehicle's operational manual regards handling and safety requirements of the battery.

Protective clothing:

- Always wear eye protection and appropriate clothing as a precautionary measure when working with the battery.
- A damp towel covering the battery when handling will minimize some splash and spark dangers.

Handling Warning:

- Naked flames, sparks, and smoking are potential ignition sources for explosions when in the vicinity of batteries.
- Avoid shorting any wiring, terminals or spanners when working around the battery, including electrostatic discharge.
- A short circuit has the potential to cause fire or the explosion of the battery, even burns to the operator/ technician.
- Only use a damp cloth with mild soap to clean the battery case, only clean terminals with battery removed from vehicle and avoid shorting terminals with brush to prevent explosion.

Explosion Danger:

- Explosive gases are emitted when batteries are charged, or in service, these gases can cause injuries such as burns and blindness.

Corrosive Warning:

- The contents of auto and industrial batteries is very corrosive, any direct contact with skin or eyes can result in burns and blindness.
- Protective clothing and safety glasses should be worn when handling to help prevent injury and or damage to property.
- Do not allow electrolyte to escape the battery case, it is a hazardous material, and should not make contact with ground water or drainage systems, intentionally or otherwise.

First Aid:

- Immediately rinse eyes with water or milk if they come into contact with acid mix, then seek medical advice without delay.
- If contact with skin occurs wash off with water and mild soap at earliest opportunity, clothes should be washed the same way and rinsed vigorously.

Disposal:

- Always dispose of failed or damaged batteries at an accredited collection station, never place batteries with household waste, do not allow battery electrolyte to escape the battery housing. If the case is damaged place into a plastic collection tray, prior to disposal. (Enquire regards local regulations)

BATTERY Replacement Guide

Please ensure extreme care is taken when replacing the battery in your vehicle. Also please make sure the engine, lights and all accessories are turned off before removing old battery. Check if vehicle has a computerised electrical system. Vehicles with on board computer systems require an alternative power source or memory minder to maintain electronic memory when the battery is disconnected. Disconnecting the battery on such a vehicle without a memory minder, may cause damage to the main computer or other electrical equipment. We recommend you wear safety glasses during the replacement procedure, be sure to use the recommended rated battery to suit your vehicle.

Safety First! Do The Right Thing.

1. Lower the driver's window enough to access the ignition keys via window. (Safety measure against total close central locking systems)
2. Turn off the engine, place into a neutral gear or park position, and engage the handbrake.
3. Fit memory minder into the cigarette lighter socket, and turn ignition key to the accessory position.*NOTE: Radio memory can only be saved if radio is still operating, prior to engaging minder.
4. It is preferred to perform replacement in a well ventilated environment. (To minimize the potential of hydrogen gas emitted from the faulty battery exploding around any sparks)
5. Remove the negative terminal first, then positive terminal and wrap the terminal securely in a rag to insulate from shorting to ground. (This precaution is necessary to avoid potential damage to the wiring and or electrics/electronics, as a terminal will be alive)
6. Remove the hold down clamp, and carefully remove the battery, take note of the battery terminal positions, both positive and negative.
7. Corroded steel parts should be cleaned and neutralized (Use bi Carb Soda), dried, and painted (sealed) with lacquer based paint. Terminals should be cleaned and brushed.
8. Cable and starter motor connections should be checked and tightened if necessary.
9. If terminal clamps or cables are badly corroded, they should be replaced.
10. Clean the battery tray (similar to step #6); make sure no objects or sharp items can cause damage to the battery case.
11. Check the height of the replacement battery to ensure there is sufficient bonnet clearance, to avoid terminals shorting/fouling on the closed bonnet.
12. Place the new battery in the tray, ensuring it sits level and that terminal posts are positioned in the same position as the battery being replaced.
13. Place into position and tighten hold downs securely so that the battery cannot move in the tray, be sure to check that radiator fan, hoses or belts do not foul the battery.
14. Refit cables ensuring that the ground terminal is connected last, if a spark occurs during reconnection of the negative terminals, have an auto electrician check for a current leak at your earliest convenience, tighten all connections. Note: Do not over tighten.
15. Never hammer terminal connections onto battery posts, as this can damage the battery terminals or cause internal damage to the battery.
16. Apply a coating of battery terminal protector or grease to the posts and bare cable connections.
17. Carefully remove memory minder from cigarette socket, and start engine, check that charge warning indicator extinguishes, and the charge gauge shows a normal level.
18. Check all radio and clock functions, to ensure no memory loss has occurred.

Disclaimer

Whilst every endeavour is made to ensure all details within this catalogue were correct at the time of printing, battery specifications and other specific information are subject to change without notice. Therefore we strongly recommend to always check the replacement battery against the existing one to ensure that the size, terminal configuration, ratings, bonnet clearance and hold down options are suitable for the application prior to installation. The content of the R & J Batteries Automotive Application Guide is provided for information purposes only, no claim is made as to the accuracy or authenticity of the content of this document. R & J Batteries accept no liability to any person for the information or advice (or the use of such information or advice) which is provided in the catalogue or incorporated into it by reference.

Warranty Information

R & J Batteries will provide the following warranty to the original purchaser subject to the terms and conditions stated herein. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Warranty Coverage

This warranty covers batteries that become unusable or unserviceable due to defects in material and/or workmanship. This warranty covers the battery types listed below, that are sized properly and used in the application for which it was intended and charged with an approved charging profile. Proof of purchase and return of good(s) in question must accompany any request for warranty. No exceptions will be accepted.

Warranty Exclusions

This warranty does not apply to batteries that break or fail due to abuse or neglect such as improper installation, application, loose wiring, corroded terminal connections, mishandled or dropped batteries, freezing, fire, explosion, or unauthorized battery modifications.

As per Australian Consumer Law if the battery usage is not for personal, domestic or household use, then R & J Batteries will not be responsible or liable for any consequential or incidental expense or loss.

To request a warranty claim, please contact your nearest R & J Batteries store on 1300 769 282 or find your nearest store at www.rjbatt.com.au
